TRANSPORTATION SERVICES

The Board of Education, while recognizing that it is not required by the state of Colorado to provide student transportation services with the exception of eligible students with special needs and students meeting the definition of homeless, nevertheless will make provisions for transportation within the following guidelines.

Priority will be given to the transportation of eligible students to school and back in an efficient, safe and economical manner.

School bus transportation may be provided for approved student activity trips for which funds are budgeted. Transportation for activity trips is available to the extent that it does not interfere with the primary function of transporting students to and from school.

General responsibility for the transportation system is vested in the chief operating officer and the director of transportation.

The chief operating officer and the director of transportation shall ensure that the transportation services of the district shall meet all state, federal and local laws and regulations for safety.

The district shall operate its own fleet of buses and other types of vehicles as needed. The purchase and maintenance of all buses and other types of vehicles shall meet all state, federal and local laws and regulations for safety.

The chief operating officer will present an annual report identifying the plan for transportation services and identify modifications needed, based on the level of resources available.
