EXTENDED HIGH SCHOOL INSTRUCTIONAL OPPORTUNITIES/PROGRAMS

A high school student may request to enroll in extended instructional opportunities for high school credit with prior approval by an administrator or designee. Such opportunities may include online learning courses/programs, travel abroad, and postsecondary educational opportunities.

All credit recognized must be earned through institutions/programs accredited by the state of Colorado or by a regional accrediting agency recognized by the Aurora Public Schools. The student is responsible for tuition and fees.

Upon successful completion, the student shall present an official transcript in order to have credit recognized for course work earned outside the District. Successful completion of course work inside the Aurora Public Schools will be included on the student's official District transcript.

High schools will not compute the grade and credit in the student's grade point average unless the successfully completed course is reflected on the student's official District transcript.
