SCHOOL ATTENDANCE AREAS

Attendance areas for every neighborhood school of the District shall be drawn up by the administration and approved by the Board, based on geography and student population projections.

In establishing school boundaries, consideration shall be given to the densities of students in an area in relation to the relative capacities of the schools, the equalization of enrollments in the classrooms and efficient use of transportation facilities.

A student's designated attendance area shall be based on the legal residence of that student's parents/guardian.

LEGAL REF.: C.R.S. 22-32-110 (1)(m)

CROSS REF.: JFBA, Intra-District Choice/Open Enrollment

SCHOOL ATTENDANCE AREAS**Page 1 of 2****A. Modifying School Attendance Areas**

While each situation for modifying school attendance areas is different, the following serve as guidelines for revising school attendance areas. It is desirable not to have any changes in attendance areas, however, in a growing District, changes need to occur periodically. Any potential changes are isolated early each fall and decisions regarding change in attendance boundaries receive numerous reviews. In many instances, changes are proposed a year or more in advance of implementation.

1. For the purpose of maintaining stability, the District will strive, to the extent possible, to keep the existing school attendance boundaries.
2. In relation to projected student enrollment, when a school capacity problem exists, the Division of Support Services will explore alternatives that will be discussed with the building principal and the building PTA or PTO board of managers and others, prior to the development of recommendation to the Superintendent of Schools or designee.
3. While every attempt is made not to separate existing neighborhoods, sometimes it is necessary.
4. When it is projected that a new housing development will increase the enrollment of a school beyond its capacity, a recommendation to revise the school assignment for that development will be made before residents move into the development.
5. When a choice exists between reassigning students from two housing developments, the development most distant from the school generally will be recommended for reassignment.
6. Whenever possible, a change in an attendance area will not be proposed unless the change is expected to remain in effect for at least three years.

SCHOOL ATTENDANCE AREAS

Page 2 of 2

7. When the enrollment at a school will exceed the school's capacity for less than four years, alternatives such as transporting one grade level to another school and temporary classrooms are considered.
8. When the high school levels are involved, attendance area changes will be made as far in advance as practicable to provide attendance options during a phase in period.

B. Excess School Enrollments

When it is projected that a school will have an enrollment that significantly exceeds the capacity of the school's facilities, the following options are considered in the process of developing a recommendation. The options are not listed in order of priority because each situation is different and the duration of the crowded conditions may vary.

1. Assign the kindergarten students to another school.
2. Add mobile classrooms to the school.
3. Convert the gifted education, art and/or music classroom(s) to regular classrooms.
4. Assign the self-contained special needs programs, if any, to another school.
5. Modify the attendance area (item A.6. above).
6. Implement an extended day or split session schedule.
7. Increase class size.
8. Construct additional permanent classrooms.

SCHOOL ATTENDANCE AREAS

Elementary Schools

Page 1 of 14

The Board of Education shall approve the attendance boundaries for each school in the district. When a school is unable to accommodate the enrollment of students from its attendance area, the additional students will be transported to or accommodated at a school designated by the Board of Education.

Subject to the District's authority to assign students to a particular school for educational reasons, students shall attend the school serving the area in which they live unless enrolled at another school for a special education program or under the Intra-District Choice/Open Enrollment policy JFBA.

Effective with the 2017-18 school year, the school attendance areas are as follows.

Altura Elementary School

BOUNDARIES:

From Airport Boulevard and the northern district boundary follow the district boundary west and south to the Union Pacific Railroad; east to Sable Boulevard; south to Sand Creek; east to Chambers Road; south to E. 23rd Avenue; west to Altura Boulevard; north to the property line between E. 23rd Avenue and E. 24th Avenue; west following the property line to Sable Boulevard; south to E. Colfax Avenue; east to the property line between the Friendly Village and Woodshire Mobile Home Parks; north to E. Montview Boulevard (extended); west to Airport Boulevard; north to the district boundary.

SCHOOL ATTENDANCE AREAS**Secondary Schools****Page 1 of 6**

The board of education shall approve the attendance boundaries for each school in the district. When a school is unable to accommodate the enrollment of students from its attendance area, the additional students will be transported to or accommodated at a school designated by the board of education.

Subject to the district's authority to assign students to a particular school for educational reasons, students shall attend the school serving the area in which they live unless enrolled at another school for a special education program or under the Intra-District Choice/Open Enrollment policy JFBA.

Effective with the 2017-18 school year, the school attendance areas are as follows.

Aurora Hills Middle School**BOUNDARIES:**

From E. Alameda Avenue and Chambers Road go west to the district boundary (Peoria Street); follow the district boundary south and east to the south side of the Cherry Creek spillway; northeast following the western branch of the Cherry Creek Spillway Trail to Chambers Road; north to E. William Smith High School

BOUNDARIES:

Receives students from all secondary schools.

School boundary changes must have prior approval of the Board of Education.

SCHOOL ATTENDANCE AREAS

K-8 Schools

Page 1 of 3

The board of education shall approve the attendance boundaries for each school in the district. When a school is unable to accommodate the enrollment of students from its attendance area, the additional students will be transported to or accommodated at a school designated by the board of education.

Subject to the district's authority to assign students to a particular school for educational reasons, students shall attend the school serving the area in which they live unless enrolled at another school for a special education program or under the Intra-District Choice/Open Enrollment policy JFBA.

Effective with the 2017-18 school year, the school attendance areas are as follows.
