PREGNANT/MARRIED STUDENTS

Educational opportunities and school activities will be available to all students who are pregnant, parenting or married, without discrimination or exclusion based solely on the student’s pregnancy or pregnancy-related medical condition. A statement, signed by a licensed medical practitioner, in addition to the permission signed by the parent/guardian of the student, will be required for participation in extracurricular athletic activities and for exemption from routine physical education classes.

Accommodations may be instituted to allow for the pregnant/parenting student to participate in his/her educational program while also meeting the obligations of his/her role as a parent. Demonstration may vary, of the same level of mastery for all students.
